Drop PDF file here or UnlimitedThis PDF Compressor is free and lets users compress PDF size online unlimited times. Fast CompressionIts powerful compression processing makes it quick to compress multiple selected PDFs.SecurityAll uploaded files are automatically deleted after 2 hours.Add Multiple FilesYou can easily compress multiple PDFs at a time, making it easy to save compressed files.User FriendlyThis tool is designed for all users and doesn't require advanced knowledge.Powerful ToolAccess the PDF Compressor online from any browser on any operating system. To compress a PDF to 200kb, simply select the PDF and use the slider. You can also add or remove PDFs from the list and download the compressed file.It’s easy and fast to compress PDFs using this tool. Simply select the PDFs you want to compress and the tool will automatically start compressing them one by one. You can compress your PDF files to 200KB or less using our tool, which also supports multiple file uploads and password-protected PDFs. The compression process is quick, taking only a few seconds for large files, and your files will be automatically deleted after 2 hours. Our tool uses HTTPS/SSL and end-to-end encryption to ensure your privacy and security. You can use this feature without a Smallpdf Pro subscription, but it does offer additional benefits like unlimited access to our compression tool and other features with our Business or Team plans. Our online PDF compressor ensures secure data protection from start to finish with every compression process. It is available for Windows, Android and iPhone devices, allowing you to compress large files even offline. You can easily upload your file, and our system will reduce its size right away. Compressed files are ready in seconds, including for larger PDFs. Our system uses TLS encryption for secure data processing, which only allows the owner to access their files. After an hour, the compressed file is deleted. We offer a range of compression options, including basic and strong compression for Smallpdf Pro users. Our tool works on Mac, Windows and Linux devices with just an internet connection needed. Our system does not require any installation or technical setup; you can simply drag and drop your PDF files to compress them quickly. The quality of the content remains intact during the compression process, so you don't have to worry about losing images, text or other document elements.
